Scenarios: Projected Impact of Physical Distancing on Spread

Daily Volume of Patients Requiring Hospitalization

Change in physical distancing
- Never began distancing
- Stop physical distancing
- Maintain current level
- More physical distancing

Effect of Physical Distancing
Summer 2020: Projected Infection in LA County

As summer approaches, if physical distancing is....

Reduced to Pre-order Levels

Maintained at Current Levels

Increased Above Current Levels

95.6%

29.8%

5.5%

...of LA County residents will have been infected over the course of the pandemic by August 1st, 2020.
Takeaways: Social distancing is working

• Current Governor’s Executive Order N-33-20 issued March 19 in effect until further notice

• Local government can be more restrictive, but not less restrictive

• Current local data suggests that physical distancing and public health directives have slowed the spread of COVID-19

• Reduction in physical distancing behavior may lead to rapid increases in cases and high demand for hospital services beyond current capacity

• Staying at home and physical distancing will allow our hospital system to remain intact and to provide services to all who need that level of care

• Guidance from CDPD and discussions about the future
