At-Home Antigen Test Distribution

- PH Health Care Centers (HCCs) ordered 80,000 kits through HRSA
- Tentative arrival late this week or early next week
- HCC will submit weekly orders until program ends in April
- First week distribution will be at 5 HCCs & homeless shelters
- Plans to engage CBOs and cities as distribution partners for subsequent weeks
<table>
<thead>
<tr>
<th>Persons Who Test Positive for COVID-19 (Isolation)</th>
<th>Recommended Action</th>
</tr>
</thead>
</table>
| Everyone, regardless of vaccination status, previous infection or lack of symptoms. | • **Stay home** (PDF) for at least 5 days.  
• Isolation can end after day 5 if symptoms are not present or are resolving **and** a diagnostic specimen* collected on day 5 or later tests negative.  
• If unable to test or choosing not to test, and symptoms are not present or are resolving, isolation can end after day 10.  
• If fever is present, isolation should be continued until fever resolves.  
• If symptoms, other than fever, are not resolving continue to isolate until symptoms are resolving or until after day 10.  
• Wear a well-fitting mask around others for a total of 10 days, especially in indoor settings (see Section below on masking for additional information) |

*Antigen test preferred.
### Persons Who are Exposed to Someone with COVID-19 (Quarantine)

- Unvaccinated; OR
- Vaccinated and booster-eligible but have **not** yet received their booster dose.**

(Refer to [CDC COVID-19 Booster Shots](https://www.cdc.gov/covid19/vaccines/boostereligibility.html) to determine who is booster eligible)

<table>
<thead>
<tr>
<th>Recommended Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Stay home</strong> (PDF) for at least 5 days, after your last contact with a person who has COVID-19.</td>
</tr>
<tr>
<td>Test on day 5.</td>
</tr>

<tr>
<td>Strongly encouraged to get vaccinated or boosted.</td>
</tr>
<tr>
<td>If testing positive, follow isolation recommendations above.</td>
</tr>
<tr>
<td>If symptoms develop, test and stay home.</td>
</tr>
</tbody>
</table>

** Workplace Setting (not applicable to healthcare personnel):**

In a workplace setting, asymptomatic employees in this category are not required to stay home from work if:

- A negative diagnostic test is obtained within 3-5 days after last exposure to a case
- Employee wears a well-fitting mask around others for a total of 10 days
- Employee continues to have no symptoms.
### Isolation & Quarantine Guidance for General Public

Masking

UPGRADE YOUR MASK

GOOD
- Wear a surgical mask

BETTER
- Double mask with a surgical mask + cloth mask OR
- Wear a fitted surgical mask

BEST
- N95
- KN95
- KF94

Note: Masks should not have a valve.

All masks should fit snugly over your mouth and nose.
